# Color Swatch Extension

To configure the extension follow these steps:

- 1. First import the CSV file using import sections. We assume in this demo that products are imported already.

- 2. Go to the configuration. In Attribute section select the product. In product all products attributes are shown. Select the "Color Swatch Groups" and import Groups are shown in this section.

- 3. These are the import Groups shown in the Color Swatch Groups section. You also add the Groups to this section.

- 4. This is color attribute also in product attributes .This shows the product shade.

- 5. These are the product shades that set to the product. Defines that which type of product is this.

Manage Options (Values of Your Attribute)

Is Default	Admin *	Default Store View
